PRODUCTION FACILITIES

Company staff consists of 300 employees, half of which are highly qualified engineers and technicians.

Approximately 7000 square meters of production facilities are equipped with plants and machinery of world famous brands from Germany, Japan, Switzerland and others.

ACCEPTANCE TESTING

The acceptance testing area is made on the “clean room” basis and provided with certified equipment to carry out necessary testing of all commercial products. Acceptance tests of biosafety cabinets consist of 23 obligatory checks whose results are formally reported. A test report copy can be enclosed to the manual upon request of the customer.

SERVICE

The company offers after-sales and technical services, highly qualified staff and well-equipped facilities. And we are ready to perform equipment validation, testing and maintenance and provide post-guarantee maintenance within a short time.

LABORATORY

Our own testing laboratory raises the quality standard of our products even further. Implementation and testing of our own technical design, materials and technology are the key success factors for LAMSYSTEMS to ensure the proper product quality.

SCIENTIFIC CO

LAMSYSTEMS specialists are actively cooperating with the leading anti-plague institutions of the Russian Federation.

Annual technical science conference organized by the company unites the most authoritative representatives of antiplague and virology institutions of the country.

EXHIBITIONS

LAMSYSTEMS products were exhibited at the specialized expositions MEDICA, BIOTECHNIKA and ANALYTICA and were praised and commended by German sector experts.
